

Good afternoon Caroline,

We wanted to address an area that needs attention to complete our administrative completeness review of the Oxy Brown Pelican Class VI permit application submitted to EPA Region 6.

Figures and maps must be provided in a format where quality is maintained, and products are legible to ensure that detailed information is accessible to Region 6. Illegible maps and figures inhibit a proper review of the application.

For example, while most of the figures in the narrative are legible, there are a few where it is difficult or impossible to make out the finer details, such as the legend in Figure 2 or well log track titles in Figure 25.

Our review team suggests that Oxy Brown Pelican upload figures in full resolution, separately in an appendix. If you have any questions, please do not hesitate to contact [Brandon Maples](#) (214-665-7252) or [Lisa Pham](#) (214-665-8326).

Thank you!

Brandon Maples
